The mission of Northern Colorado Wildlife Center, a 501(c)3 independent nonprofit, is to protect wildlife and the places they call home through rescue, rehabilitation, education, and advocacy.

**Rehabilitate** sick, injured, and orphaned wildlife, and when successful, release those animals back into their natural habitats.

**Educate** the public about the natural histories of wildlife native to northern Colorado, ways to peacefully coexist with them, and provide humane solutions to human-wildlife conflicts.

**Advocate** for the preservation and restoration of native ecosystems that provide wildlife places to live and thrive.
